LIRONE, born in 1964, is a French photographer, visual artist and designer. Since his childhood, he was passionate about photography, for a beautiful and pure vision of what he sees. Professional photographer since 1990, Lirone is an avid about the image, constantly looking for innovative techniques. In 1994, his career specializes in portrait, with a special "madness" for portraits of babies and children. In the late 90s, he extends his expertise to the world of industrial photography in France and internationally (USA, Great Britain, Switzerland ...). Then he worked for automobile industry, fashion, culinary art, jewelery ; Mercedes, Peugeot, Perrier, Nestlé, LVMH...

To renew the exercise of vision, he invented in 2006 a unique and revolutionary concept that combines aesthetically and in an original way, photo, painting and sculpture, based on a direct visualization of a 3D image. His artworks give off a surprising new depth :

- By adjusting your position, they are constantly recomposing under your eyes
 - As you move, the pattern is breaking down but is conserved
 - In front of the artwork, the eyes look the impenetrable depths of the crystal
- The visualization process of his artworks in 3D is patented and registered internationally at the INPI since August 2006.

His artworks are exhibited globally in art galleries : Paris, Lyon, New York, San Francisco, Geneva, Crans Montana, Singapore, Courchevel, Megève, Honfleur, Saint-Tropez, Cannes, Saint-Paul-de-Vence, Tel Aviv, Jerusalem... Major institutions have acquired his artworks like LVMH, Grévin Museum, Euro Media France, Van Cleef & Arpels... and private collectors.
